manifestos / payback

**new call:
4th cycle 2021-2023**

What is a MANIFESTO today?

Form generation, material exploration, geometric speculation, process manipulation: architecture and design has been there. No matter what the actual focus was, there was always an inward-looking attitude that despite all good intentions resulted in a largely self-referential, often elitist and ultimately impeded approach. It is time for architecture's PAYBACK. Design is becoming conscious, socially responsive and political (again) while is getting ready to give people something in return.
