# 1. NYC'S SUBWAY STATION: CHAMBERS STREET DISUSED PLATFORM

BROOKLYN, NEW YORK

In this project, a series of windows have been placed inside an abandoned underground station. Behind each of these windows, dynamic screens present real-time live feeds, capturing views from different corners of the globe.

**& VILLA IOLA**

ATHENS, GREECE

ALEXANDROS IOLAS' RESIDENCE

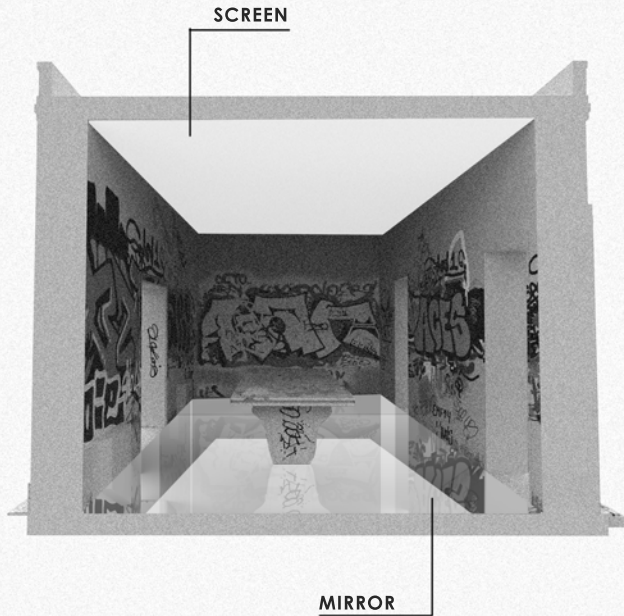

In this project, metal pipes drip water into the hanging baskets of Bethlehem Steel's changing room so that the jackets hanging on them remain constantly wet. Because of the slight slope of the floor, the water flows into a gutter around Villa Iola and from there into Room 4.

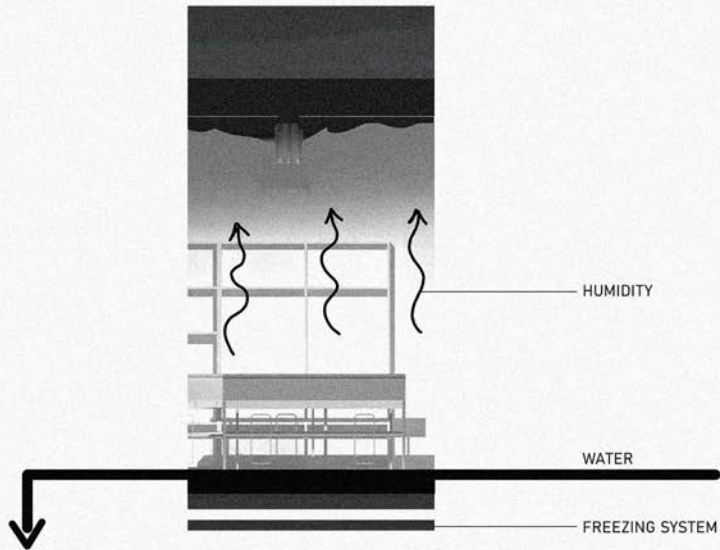

Inside Villa lola, a screen on the ceiling projects a video of Alexandros lolas having dinner with a company and the floor is a mirror.

## 4. PRIPYAT SCHOOL

PRIPYAT, UKRAINE

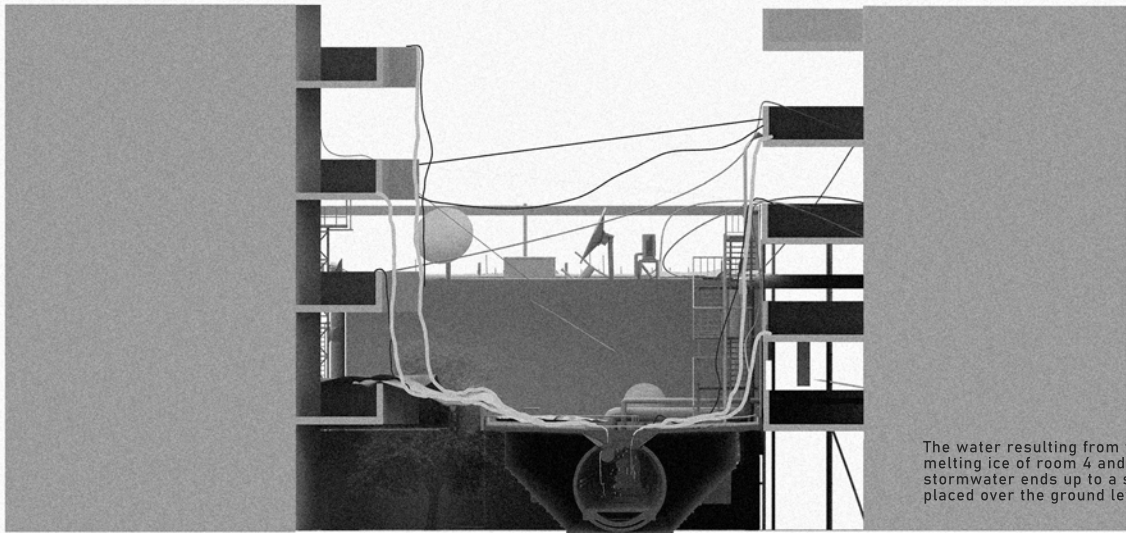

## 5. SEWER

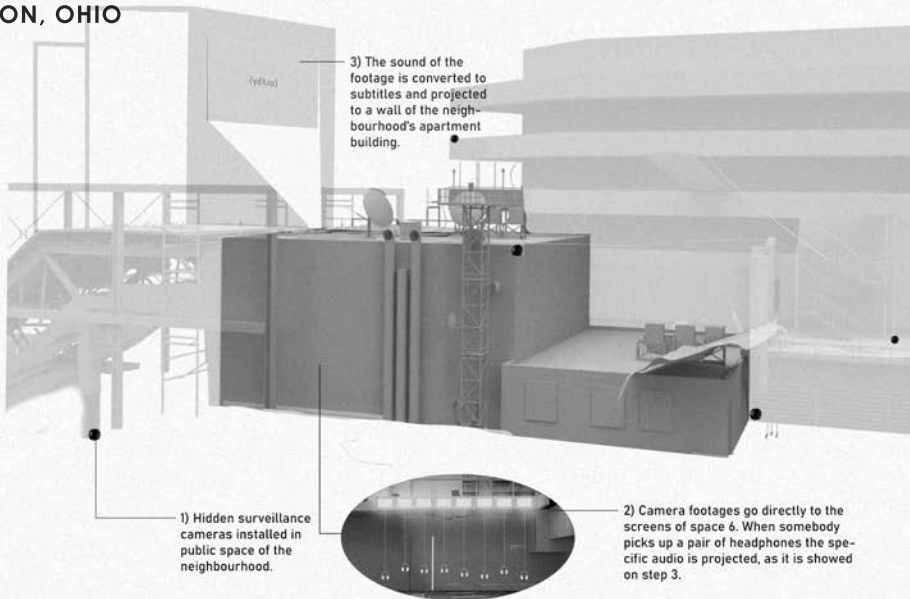

The water resulting from the melting ice of room 4 and stormwater ends up to a sewer placed over the ground level.

ME KATI

A black and white photograph of a dense urban landscape, likely in Greece. The foreground features a large, light-colored building wall with a political slogan painted on it. The slogan is in Greek and translates to "Giannis, please help me a little more." The background shows a dense cluster of multi-story apartment buildings with balconies, many of which have satellite dishes and laundry hanging on them. The buildings are packed closely together, and the overall scene suggests a crowded, urban environment.

## 8. FISHER BODY PLANT 21

DETROIT, MICHIGAN

AUTO BODY MANUFACTURING, INDUSTRIAL PAINTING

Passers-by throw rubbish into a glass container which leads to room 8. From there, the rubbish travels through all the ground floor areas by means of a baggage carousel, before ending up in a hole in one of the rooms in Room 6.
